

## Pre-congress content Session 00:00 - 23:59

## Year in review: Paediatric year in review

**Aims :** To provide an update on four topics in paediatric respiratory medicine, namely, new developments in childhood interstitial lung diseases, COVID infections in children, paediatric sleep disordered breathing and the epidemiology of asthma; to highlight the most recent and significant literature and developments relating to these topics.

**Disease(s) :** Interstitial lung diseases Paediatric respiratory diseases Respiratory infections

**Method(s) :** Epidemiology General respiratory patient care

**Tag(s) :** Clinical, COVID, Translational

**Target audience :** Adult pulmonologist/Clinician, Medical Student, Nurse, Paediatrician, Physician in Pulmonary Training, Respiratory physiotherapist, Scientist (basic, translational), Clinical researcher, Journalist

00:00 **What's new in interstitial lung diseases in children?**  
Steve Cunningham (Edinburgh (Scotland), United Kingdom)

00:15 **Paediatric respiratory infections: COVID-19 in children**  
Elizabeth Whittaker (London, United Kingdom)

00:30 **What's new in paediatric sleep?**  
Kim Van Hoorenbeeck (Edegem (Antwerp), Belgium)

00:45 **What's new in the epidemiology of asthma?**  
Liesbeth Duijts (Rotterdam, Netherlands)

## Pre-congress content Session 00:00 - 23:59

## Year in review: Scientific year in review

**Aims :** To cover four key areas that were of particular importance in basic and translational lung research in 2020 and relate to the 2020 Nobel Prize in Chemistry, the congress theme of digital health and COVID-19 diagnosis and vaccination.

**Disease(s) :** Airway diseases Paediatric respiratory diseases Respiratory infections

**Method(s) :** Cell and molecular biology Imaging Respiratory intensive care

**Tag(s) :** Translational , COVID, Basic science

**Target audience :** Adult pulmonologist/Clinician, Clinical researcher, General practitioner, Medical Student, Respiratory critical care physician, Paediatrician, Pathologist, Physician in Pulmonary Training, Radiologist, Scientist (basic, translational), Thoracic oncologist, Journalist

00:00 **Lung-directed CRISPR/Cas9 gene editing**  
Patrick Harrison (Cork, Ireland)

00:15 **The immune response to COVID-19**  
Lore Vanderbeke (Leuven, Belgium)

00:30 **Artificial intelligence in pulmonary medicine**  
Danai Khemasuwan (Cleveland, United States of America)

00:45 **COVID-19 mRNA vaccines: a step forward from traditional vaccines?**  
Speaker to be confirmed

## Pre-congress content Session 00:00 - 23:59

## Year in review: Clinical year in review

**Aims :** To provide an overview of the most relevant advances in diagnosis and treatment of some of the most prevalent respiratory diseases; to present the most important studies published in the last 12 months about clinical aspects of COVID-19, chronic obstructive pulmonary disease (COPD), asthma and interstitial lung disease.

**Disease(s) :** Airway diseases Interstitial lung diseases Respiratory infections

**Method(s) :** General respiratory patient care

**Tag(s) :** Clinical, COVID

**Target audience :** Adult pulmonologist/Clinician, Clinical researcher, General practitioner, Physician in Pulmonary Training

00:00 **COVID-19: impact on respiratory patients and prevention**  
Mona Bafadhel (Oxford (Oxfordshire), United Kingdom)

**00:15 COPD: implementing biomarkers to improve prognosis**  
Miriam Barrecheguren Fernandez (Barcelona, Spain)

**00:30 Severe asthma: classification and treatment**  
Guy Brusselle (Ghent, Belgium)

**00:45 Interstitial lung disease: improving classification and prognosis**  
Luca Richeldi (Roma, Italy)

**Pre-congress content Session 00:00 - 23:59**

**Experts view: Performing cardiopulmonary exercise testing in the COVID-19 era**

**Method(s) :** Pulmonary function testing

**Tag(s) :** COVID, Clinical

**Chairs :** Chair to be confirmed

**00:00 Performing cardiopulmonary exercise testing in the COVID-19 era**  
William Stringer (Long Beach, United States of America), Afroditi Boutou (Thessaloniki, Greece)

**Pre-congress content Session 00:00 - 23:59**

**Experts view: Respiratory physiology**

**Method(s) :** Physiology General respiratory patient care

**Symposium: Holistic care in interstitial lung disease: monitoring the patient's pathway****Monitoring patients with interstitial lung disease via telemedicine**

**Aims :** to explain the issues associated with monitoring patients with idiopathic pulmonary fibrosis at home during the COVID-19 pandemic; to describe rapidly evolving changes in clinical practice for patients with pre-existing respiratory problems especially interstitial lung disease (ILD) and idiopathic pulmonary fibrosis, including methods initially developed to provide medical access for patients in remote areas and patients who cannot be seen in person; to describe the appropriateness and limitations of telemedicine; to discuss the clinical utility of home spirometry, monitoring of oxygenation using patients' own pulse oximetry devices, the potential utility of measuring forced vital capacity using handheld spirometry devices for assessing the severity of a patient's disease status in their home and the assessment of overall physical activities in a patient's home.

**Aims :** to describe the mechanisms underlying epithelial barrier disruption and impaired recovery in response to environmental triggers, which are crucial for the development of novel therapeutic strategies, including stem cell-based strategies; to provide an overview of the cellular and molecular mechanisms involved in epithelial damage and repair as well as abnormalities of these mechanisms in lung disease and regulation of these processes by virus-induced innate immune responses; to explain the complex role of the epithelial barrier in the onset and progression of pulmonary diseases and its potential to serve as a target for therapeutic strategies; to differentiate between epithelial cell death modalities and to describe how these contribute to lung tissue damage in chronic obstructive pulmonary disease (COPD); to explain how the release of specific danger molecules upon epithelial injury, e.g., those acting on receptor for advanced glycation end products (RAGE), can result in alveolar tissue damage and impaired lung tissue regeneration in COPD; to describe the role of innate immune responses in abnormal lung tissue regeneration upon viral infection; to describe the potential of stem cells for epithelial regeneration upon infection in cystic fibrosis (CF) patients.

**Aims :** To discuss the potential for implementation of e-Health/m-Health technologies in routine respiratory medicine; to explain novel methods for telemonitoring, telerehabilitation, use of artificial intelligence technologies and m-Health for different groups of respiratory patients; to identify the main challenges for adoption and implementation of e-Health/m-Health technologies in clinical practice; to provide an update on developments in digital technology and demonstrate its use in clinical practice.

**Disease(s) :** Paediatric respiratory diseases Pulmonary vascular diseases Sleep and breathing disorders

**Method(s) :** General respiratory patient care Imaging Pulmonary rehabilitation

**Tag(s) :** Clinical, Digital health

**Target audience :** Adult pulmonologist/Clinician, Clinical researcher, General practitioner, Medical Student, Medical Technical Assistant, Nurse, Respiratory critical care physician, Paediatrician, Pathologist, Patient, Physician in Pulmonary Training, Physiologist, Radiologist, Respiratory physiotherapist, Scientist (basic, translational), Thoracic oncologist, Thoracic surgeon, Respiratory therapist, Journalist

**Chairs :** Vitalii Poberezhets (Vinnytsia, Ukraine), Hilary Pinnock (Edinburgh (Edinburgh), United Kingdom)

**14:45 Introduction**

**14:50 The World Health Organization global strategy on digital health 2020–2025: perspectives for respiratory medicine**  
Speaker to be confirmed

**15:05 Artificial intelligence in the clinic: possible roles for pulmonary rehabilitation tests**  
Wim Janssens (Leuven, Belgium)

**15:20 Telerehabilitation and telemonitoring of pulmonary patients**  
Ioannis Vogiatzis Oikonomidis (Newcastle upon Tyne, United Kingdom)

**15:35 Behavioural changes of patients and health professionals in the digital era**  
Marieke Verkleij (Amsterdam, Netherlands)

### Symposium: Diagnostic and therapeutic advances in mesothelioma care

**Aims :** To describe the latest achievements in diagnosis and treatment of pleural mesothelioma in light of the recent application of artificial intelligence for medical diagnosis and care.

**Disease(s) :** Thoracic oncology

**Method(s) :** Endoscopy and interventional pulmonology Epidemiology Surgery

**Tag(s) :** Clinical, Digital health

**Target audience :** Adult pulmonologist/Clinician, Medical Student, Nurse, Respiratory critical care physician, Radiologist, Scientist (basic, translational), Thoracic oncologist, Thoracic surgeon

**Chairs :** Federica Meloni (Pavia (PV), Italy), Torsten Gerriet Blum (Berlin, Germany)

**14:45 Introduction**

**14:50 Artificial intelligence in diagnosis of mesothelioma**  
Françoise Galateau-Salle (Caen, France)

**15:05 The next mesothelioma frontiers: targeted therapies**  
Jens Soerensen (Copenhagen, Denmark)

**15:20 Intrathoracic hyperthermic chemotherapy: facts and fables**  
Till Markowiak (Regensburg, Germany)

**15:35 Surgery in the era of immune and targeted therapy**  
Isabelle Opitz (Zurich, Switzerland)

**15:50 Discussion and Q&A**

**Primary care session: Part II: restarting asthma care in the post-COVID era**  
**An opportunity to improve asthma monitoring and self-management in primary care**

**Aims :** To provide an overview of and a discussion forum for important issues relating to the management of asthma and chronic obstructive pulmonary disease after the COVID-19 pandemic; to present new approaches for managing patients in primary care during the COVID-19 pandemic; to invite feedback from the audience.

**Disease(s) :** Airway diseases

**Method(s) :** General respiratory patient care

**Tag(s) :** Clinical, COVID, Digital health

**Target audience :** General practitioner, Nurse, Patient, Adult pulmonologist/Clinician, Medical Student, Paediatrician

**Chairs :** Hilary Pinnock (Edinburgh (Edinburgh), United Kingdom), Miguel Román Rodriguez (Palma De Mallorca, Spain), Chair to be confirmed

**10:55 Introduction**

**11:00 Remote consultations to monitor asthma in primary care**  
Hanna Sandelowsky (Vendelso, Sweden)

**11:15 What is the best way to engage people with asthma in self-management?**

### Symposium: Sarcopenia in chronic respiratory disease: new definitions, assessment and treatment options

**Aims :** To describe the concept of sarcopenia in chronic respiratory disease and its importance to maintain and/or optimise the benefits of pulmonary rehabilitation; to describe the assessment of sarcopenia in chronic respiratory disease; to describe how to implement and assess the treatment options for sarcopenia in chronic lung disease; to describe the effects of sarcopenia on patients undergoing pulmonary rehabilitation.

**Disease(s) :** Airway diseases Thoracic oncology

**Method(s) :** General respiratory patient care Physiology Pulmonary rehabilitation

**Tag(s) :** Clinical

**Target audience :** Adult pulmonologist/Clinician, Clinical researcher, General practitioner, Medical Student, Medical Technical Assistant, Nurse, Patient, Physician in Pulmonary Training, Physiologist, Radiologist, Respiratory physiotherapist, Scientist (basic, translational), Thoracic oncologist, Respiratory therapist

**Chairs :** Martijn A. Spruit (Horn, Netherlands), Charlotte Suppli Ulrik (Virum, Denmark)

**Lungs on fire: LoF Interstitial lung diseases?**

**Aims :** To describe real-life clinical cases during the innovative interactive session, including the presentation of cases that have various levels of difficulty and often necessitate a differential diagnosis. This session will be led by a discussant, who will present the cases to a panel of experts and the audience. The discussant will encourage discussion among the panel of experts, who are encountering these cases for the first time. To further determine diagnostic and therapeutic options for these patients, the discussant will also invite audience participation in the reflexion and discussion of these cases.

### Lungs on fire: LoF Lung cancer?

**Aims :** To describe real-life clinical cases during the innovative interactive session, including the presentation of cases that have various levels of difficulty and often necessitate a differential diagnosis. This session will be led by a discussant, who will present the cases to a panel of experts and the audience. The discussant will encourage discussion among the panel of experts, who are encountering these cases for the first time. To further determine diagnostic and therapeutic options for these patients, the discussant will also invite audience participation in the reflexion and discussion of these cases.

## Session

11:15 - 12:45

## Hot topics: How science conquered COVID-19: from big platform trials to patients

**Aims :** To describe ground-breaking news about phenotyping and managing acute hospitalised COVID patients; to describe several key studies, results and advances including the recent RECOVERY-RS study of respiratory support, phenotyping to assist risk stratification and the results of the international RECOVERY and REMAP-CAP trials.

**Disease(s) :** Respiratory critical care Respiratory infections

**Tag(s) :** Translational , COVID

**Target audience :** Adult pulmonologist/Clinician, Clinical researcher, Medical Student, Respiratory critical care physician, Physician in Pulmonary Training, Respiratory therapist

**Chairs :** Anita Simonds (London, United Kingdom), Winfried J. Randerath (Solingen, Germany)

11:15 Introduction

11:20 **Phenotypes in acute COVID: lessons from the multicentre studies**  
Charlotte Summers (Cambridge (Cambridgeshire), United Kingdom)

11:35 **Needing oxygen in COVID? Acute respiratory support (RECOVERY-RS), continuous positive airway pressure, high-flow nasal oxygen and other approaches controversies**  
Gavin D Perkins (Birmingham (West Midlands), United Kingdom)

11:50 **Research prioritisation in long COVID: using patients and experts to develop an international consensus**  
Luke Daines (Edinburgh (Edinburgh), United Kingdom)

12:05 **What have we learned from big platform trials of COVID? RECOVERY, REMAP-CAP and others**

**Lungs on fire: LoF Airway diseases?**

**Aims :** To describe real-life clinical cases during the innovative interactive session, including the presentation of cases that have various levels of difficulty and often necessitate a differential diagnosis. This session will be led by a discussant, who will present the cases to a panel of experts and the audience. The discussant will encourage discussion among the panel of experts, who are encountering these cases for the first time. To further determine diagnostic and therapeutic options for these patients, the discussant will also invite audience participation in the reflexion and discussion of these cases.

**Respiratory medicine meets other disciplines: Emerging data for the management of respiratory tract infections**

A joint ERS/ESCMID session. Results from the current European Clinical Research Initiative on Antimicrobial resistance and emerging Infectious Diseases (ECRAID) - Value-Dx project

**Aims :** To present the first data emerging from the European project of Value Dx aimed at investigating the use of old and new diagnostic tests to optimise the use of antimicrobials and the management of respiratory infections across different settings (from primary care to intensive care units); to provide an overview and update of the role of diagnostics in the management of respiratory infections by reducing the overuse of antimicrobials and optimising clinical outcomes, utilisation of healthcare resources and economics. The Value Dx project is part of the European clinical research initiative on antimicrobial resistance and emerging infectious diseases.

Session

11:15 - 12:45

**Lungs on fire: LoF Respiratory infections?**

**Aims :** To describe real-life clinical cases during the innovative interactive session, including the presentation of cases that have various levels of difficulty and often necessitate a differential diagnosis. This session will be led by a discussant, who will present the cases to a panel of experts and the audience. The discussant will encourage discussion among the panel of experts, who are encountering these cases for the first time. To further determine diagnostic and therapeutic options for these patients, the discussant will also invite audience participation in the reflexion and discussion of these cases.

**Disease(s) :** Respiratory infections

**Tag(s) :** Clinical

**Target audience :** Adult pulmonologist/Clinician, Clinical researcher, General practitioner, Physician in Pulmonary Training, Respiratory critical care physician, Radiologist, Nurse, Medical Student

**Chairs :** Marc Miravittles (Barcelona (CT), Spain), Miriam Barrecheguren Fernandez (Barcelona, Spain), Tobias Welte (Hannover, Germany)

### Industry Virtual Symposium: The role and timing of antiviral therapy in the treatment of hospitalised patients with COVID-19

Organised by Gilead Sciences Europe Ltd

**Aims :** Since the start of the COVID-19 pandemic multiple treatment approaches have been explored. This session examines the science behind antiviral therapy, and the rationale to target SARS-CoV-2 replication directly. Attendees will hear key data supporting the most effective use of antiviral medicine and witness scientific debates about the timing of therapy initiation. By the completion of the session, the audience will understand the latest data supporting the role of antiviral medication and also consider the potential future direction of antivirals for the prevention of the serious and sometimes fatal complications of SARS-CoV-2.
