Deliverable 4.8: Report on status of posting results clinical trial

The trial analyses specified in the Statistical Analysis Plan and the mixed-methods Process Evaluation analyses have now been completed, along with some post-hoc exploratory analyses.

We plan to perform some additional exploratory analyses in the coming weeks and months, to deepen our understanding and enable us to better explain the trial findings.

The trial results were presented at the VALUE-Dx Closing Conference in Valencia on 4th September 2024 and at the European Respiratory Society Congress in Vienna on 10th September 2024 (via oral presentation in both cases).

Another oral presentation will take place at the General practice Research on Infections (GRIN) Annual Meeting in Cardiff on 27th September 2024.

There will be a poster presentation of the results at the International Clinical Trials Methodology Conference in Edinburgh on 1st October.

We await publication of two Process Evaluation papers: one has been accepted by the Journal of Antimicrobial Chemotherapy, and the other one is currently under review by BJGP Open.

We plan to publish the main trial paper and an accompanying Process Evaluation paper in a high-impact peer-reviewed journal by 30th December 2024. Further publications are planned for late 2024 and in 2025 (titles and number of publications to be confirmed).

The trial results will be posted on the ISRCTN registry (by 30th December 2024), as per funder requirements.
